

POLICE LINESHEET 2025

ARKTIS POLICE LINESHEET

In 1985, an ex-Royal Marine started Arktis to create superior military gear. Today, Arktis produces specialist clothing and equipment for various military and police organizations, and outdoor enthusiasts worldwide, staying committed to the 'Quality of Endurance' established in the '80s.

“We’ve transported jackets to airstrips for waiting planes and shipped gear from the Arctic to the Sahara. Our products and their owners have countless stories.”

At Arktis, our approach to designing excellent gear involves hands-on experience. We design, prototype, and modify our products in our UK office to ensure the highest quality and fuel our enthusiasm and innovation. We’re proud of our history and excited for the future, looking forward to sharing our next innovations with our customers.

Over the years, Arktis has grown an extensive customer list. Here are a few we have been incredibly honoured to serve.

The purpose of this catalogue is to showcase the capability we have at Arktis, and present the range of products we currently produce for the UK Police and Emergency services.

The focus at Arktis is on Government supply through specific unit needs, special projects or tender opportunities.

Over the years we have worked closely with the end user from a variety of tactical fields, sharing their knowledge and allowing us to develop products which are 'right' for the job.

Our in-house R&D Lab and UK production facilities offer customers that unique opportunity to work on exclusive projects and solutions with the Arktis team.

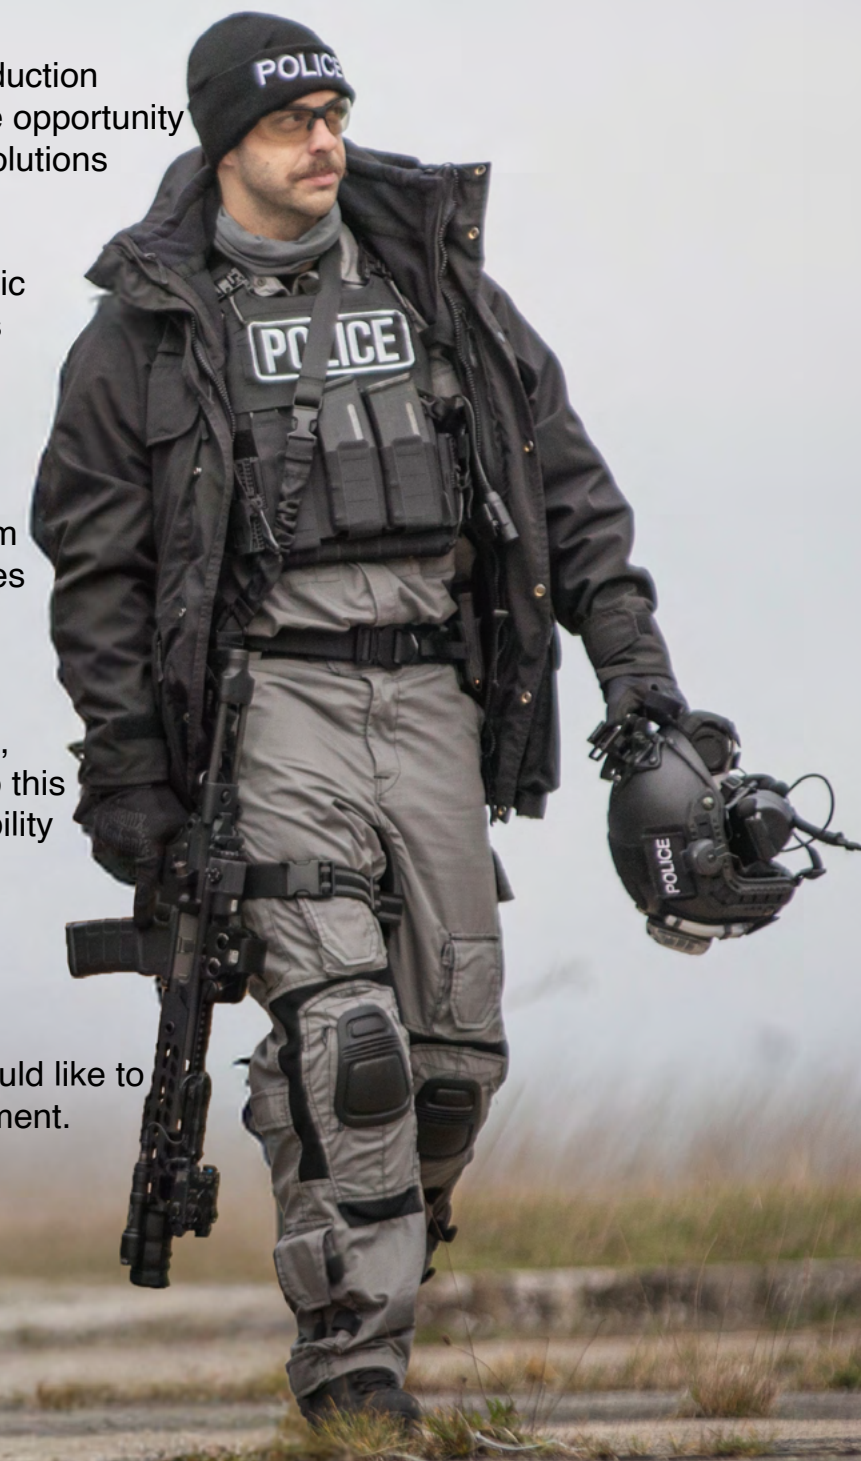

Advanced design and technical fabric innovation honed in military use has enabled us to develop cutting edge products which embrace our design Ethos of Fabric, Fit, Function. We have the capability to scale up production and can easily move from 100pcs to 10,000pcs if demand takes off.

“Quality of Endurance” is a commitment we made 40 years ago, and all new products must live up to this reputation of Rugged Quality, Durability and British Heritage.

‘Built for the Job, tested in battle, proven in the field’

Please contact us directly is you would like to discuss a special project or requirement.
